Ivory Pinstripe Bunting

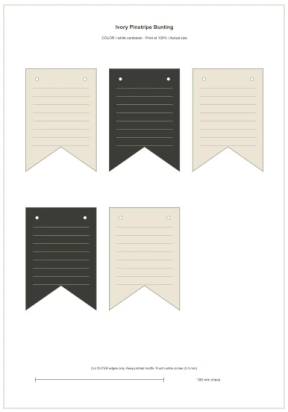

Paper: 1 A4 or US Letter sheet(s) of 140-180 gsm cardstock for five 55 × 80 mm flags. Choose the color pages on white cardstock, or outline pages on light-colored cardstock.

Materials: Cardstock in the size below; Scissors and ruler; 2-3 mm hole punch; About 1.5 m of thin cord

Construction diagrams use the exact printable shapes. The cover is an AI finished-project visualization; the actual printable shapes, dimensions and hole positions govern the project. Not physically assembled by this site.

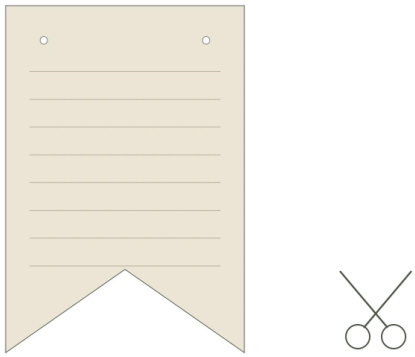

Print at 100% / Actual size, with Fit to page disabled. Check the 100 mm bar. Use white cardstock for color pages, or light-colored cardstock for outline pages. For dark palettes, use the color version on white cardstock. Print only the version and pages needed.

Illustrated section 1

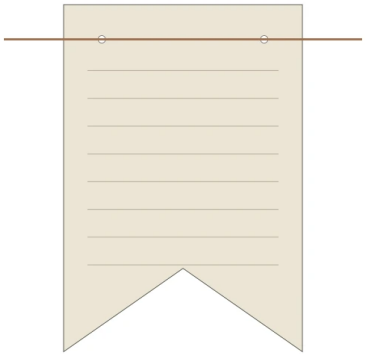

Print the 1 color page(s) or matching outline page(s), at 100% / Actual size. Check that the printed scale bar measures 100 mm.

Illustrated section 2

Cut out all five flags along their complete outer outlines. Leave the printed motifs intact; do not cut the decorative lines inside.

Illustrated section 3

Punch both marked white holes in each flag. Thread the cord from the back through the left hole, across the front, then back through the right hole. Repeat for all five flags.

Illustrated section 4

Slide the flags to leave roughly 3-5 cm between them. Leave enough cord at both ends, tie loops and hang the lightweight bunting on suitable removable hooks.
