Ivory Paper Star Garland

Paper: 1 A4 or US Letter sheet(s) of 140-180 gsm cardstock, containing eight cutouts fitted inside 50 × 60 mm areas; actual contour sizes vary by shape. Choose color or outline pages; print only the version needed.

Materials: Cardstock in the size below; Scissors and ruler; 2-3 mm hole punch; About 2.5 m of thin cord

Construction diagrams use the exact printable shapes. The cover is an AI finished-project visualization; the actual printable shapes, dimensions and hole positions govern the project. Not physically assembled by this site.

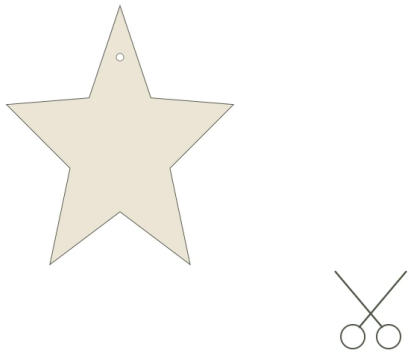

Print at 100% / Actual size, with Fit to page disabled. Check the 100 mm bar. Use white cardstock for color pages, or light-colored cardstock for outline pages. For dark palettes, use the color version on white cardstock. Print only the version and pages needed.

Illustrated section 1

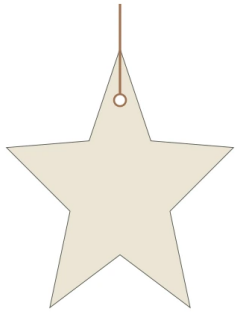

Print the 1 color page(s), or the outline version on light-colored cardstock. Disable Fit to page and check the 100 mm scale bar.

Illustrated section 2

Cut all eight pieces along their outer contours. Keep the printed interior veins and patterns intact. For curved outlines, rotate the paper as you cut.

Illustrated section 3

Punch the single marked hole in each piece. Cut eight 12 cm cord lengths, thread one through each hole and knot it. Tie those short hangers to a separate main cord about 1.2 m long.

Illustrated section 4

Space the eight pieces roughly 3-5 cm apart and vary the short hanging lengths slightly. Hang the main cord as a light wall or shelf decoration. The pieces remain flat cut paper, not folded 3D sculptures.
