Five-Compartment Origami Bowl

Paper: One 20 × 20 cm grey square, preferably 70–90 gsm. The result is a five-compartment paper organizer for small dry items.

Materials: Thin origami paper in the size below; Ruler and scissors for cutting the starting square

Figures retain the original folding sequence. Grey/white represent paper faces, not mandatory colors. Use thin paper and crease accurately. Instructions have been compared with the source; no physical test fold has been performed by this site.

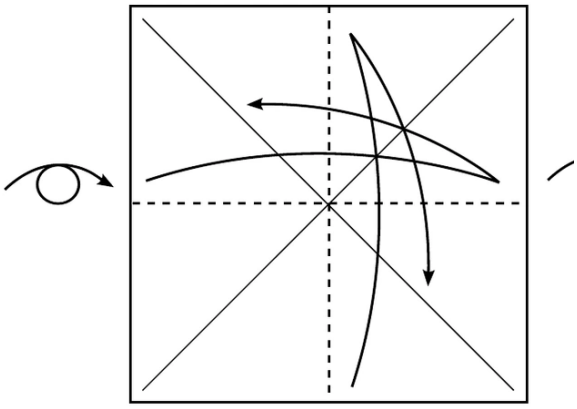

Illustrated section 1

1.

Colored side up: crease both diagonals and unfold.

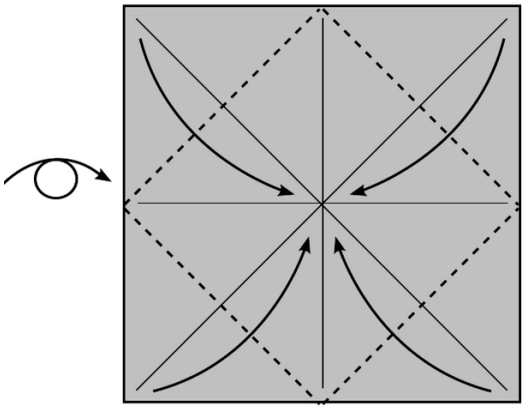

Illustrated section 2

2.

Turn over; crease both midlines and unfold.

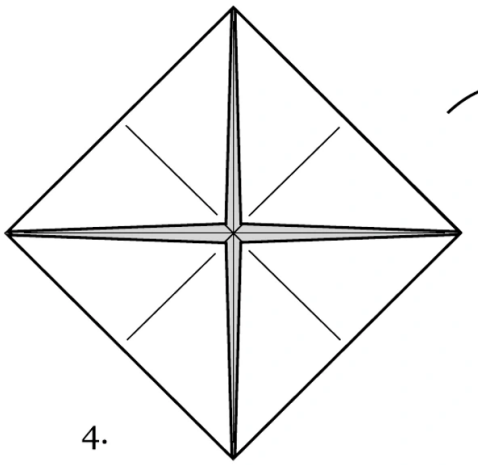

Illustrated section 3

3.

Turn over again. Fold all four corners to the center.

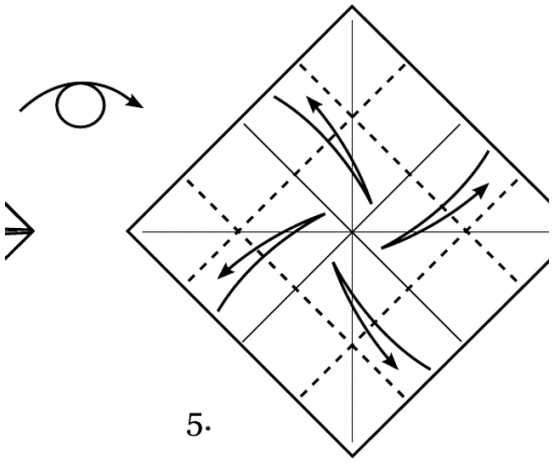

Illustrated section 4

4.

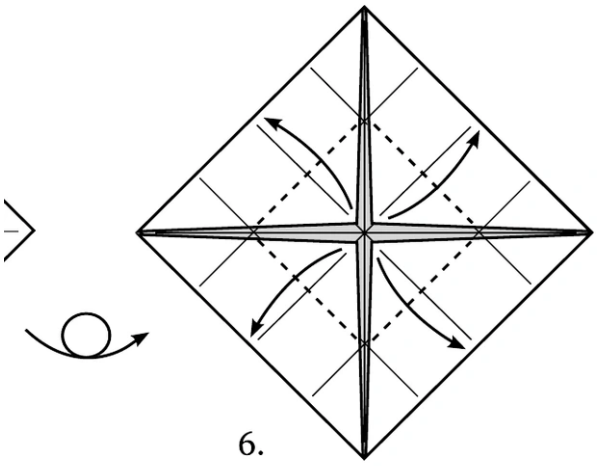

Check the four corner tips meet precisely at the center.

Illustrated section 5

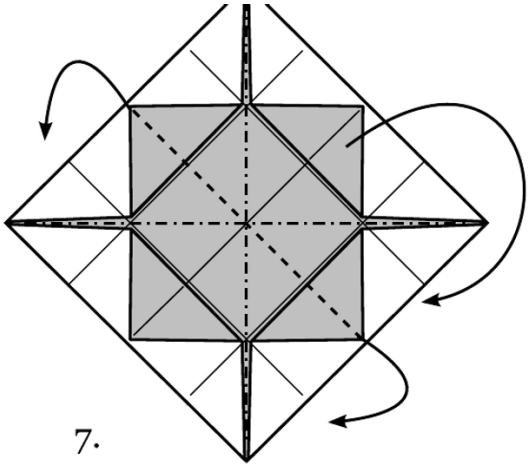

Turn over. Fold each edge to the center line to make the four indicated creases; unfold each time.

Illustrated section 6

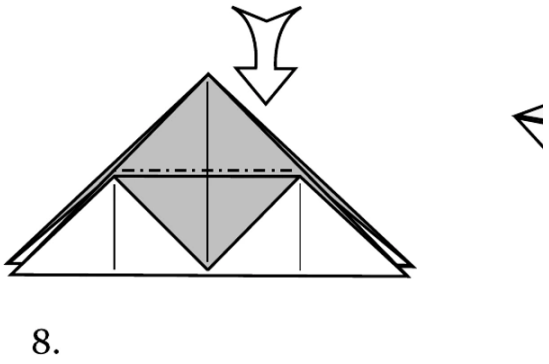

Turn back. Fold the central tips outward along the indicated lines and unfold.

Illustrated section 7

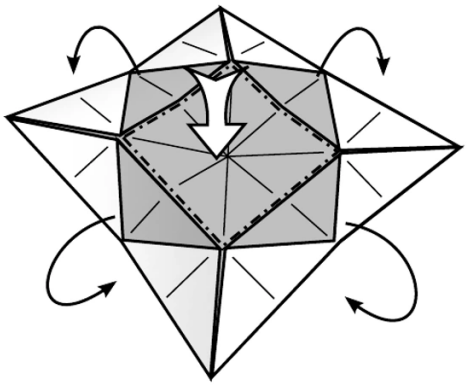

Use the central diagonal creases to collapse the model into a triangle; the outer corner flaps remain outside.

Illustrated section 8

Press the collapsed triangle flat.

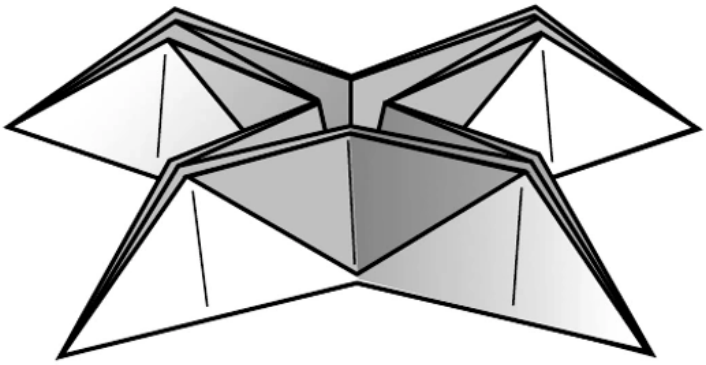

Illustrated section 9

9.

Open, change the diagonal direction, and collapse again along the arrows to prepare the same creases on all sides.

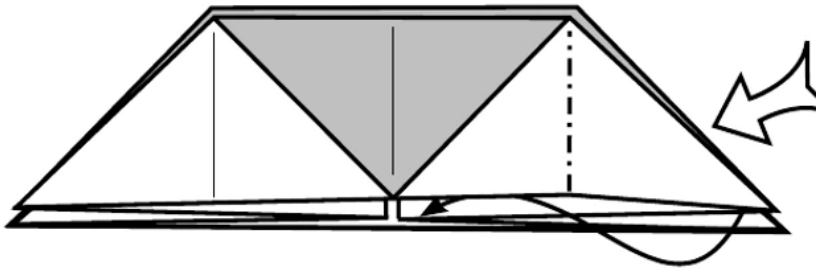

Illustrated section 10

10.

Check the four projecting corners and the raised central section match this view.

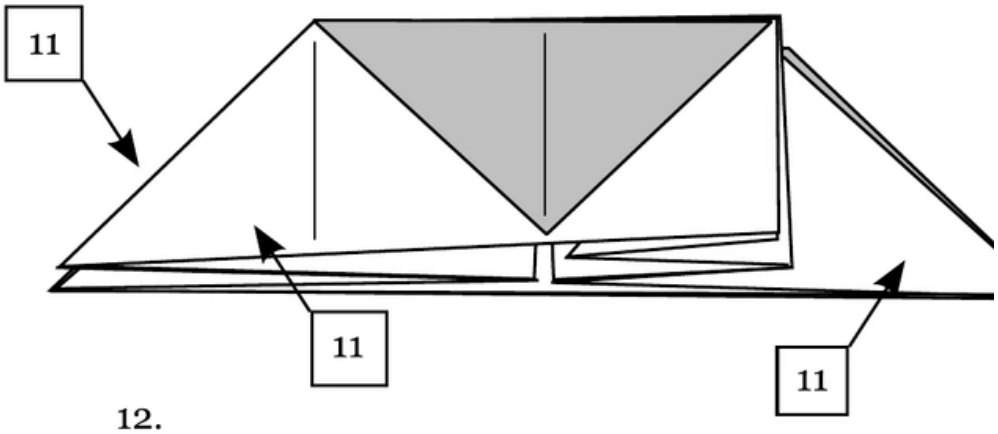

Illustrated section 11

11.

Inside-reverse-fold the projecting right corner into the model along its marked vertical crease.

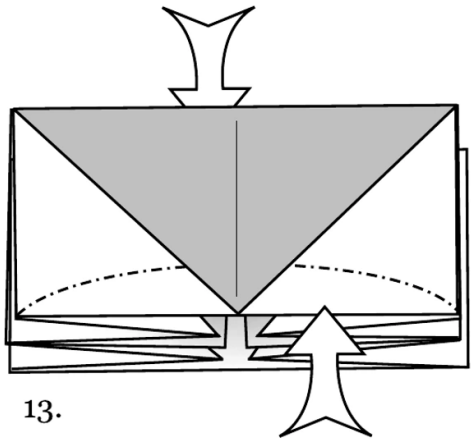

Illustrated section 12

12.

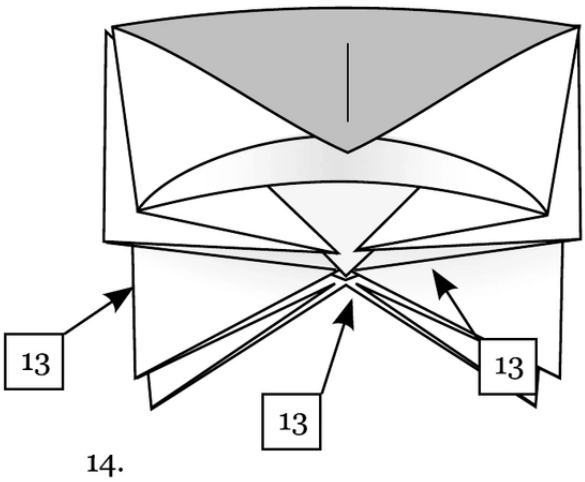

Repeat the inside reverse fold on the other three projecting corners.

Illustrated section 13

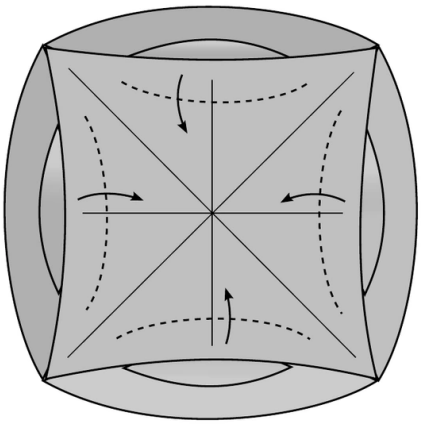

Open the pocket at the lower edge and squash it along the curved arrows.

Illustrated section 14

Repeat step 13 on the remaining three pockets.

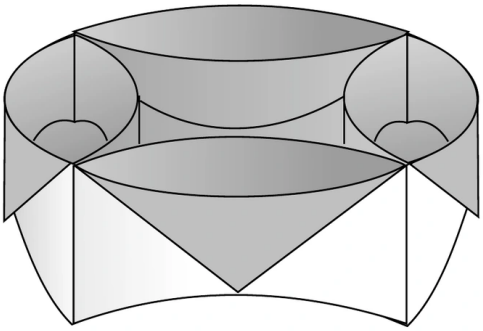

Illustrated section 15

15.

Open the center from above, gently pushing the four walls outward to form the organizer.

Illustrated section 16

Check the completed structure against the original finished diagram, then gently adjust the folds.
