Wildflower Meadow Gift Box

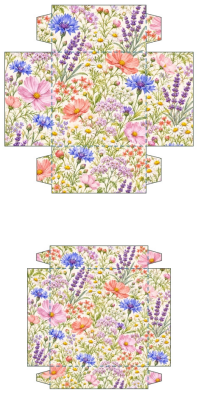

Paper: One A4 or Letter sheet of 180–220 gsm white cardstock.

Materials: White cardstock, scissors, ruler, blunt scoring tool, paper glue and clips while drying.

The finished image is an AI visualization. Follow the actual printable shapes and dimensions; this project has not been physically assembled.

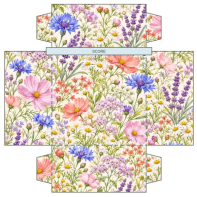

Print at 100% / Actual size; turn off Fit to page. Check the 100 mm bar. Color page on white paper; outline page on light colored paper. Print only the required version.

Illustrated section 1

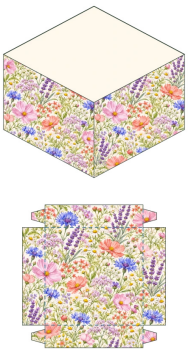

Print the color page at 100% and check the 100 mm bar. Cut the two separate continuous outer contours: the larger cross makes the base, the smaller cross makes the lid. Keep all four small tabs on each part.

Illustrated section 2

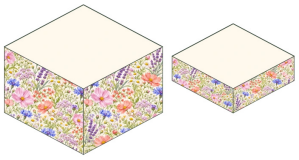

Score every blue dashed line against a ruler with a blunt tool. Pre-fold the four walls and four tabs upward toward the unprinted side, then open them again. Repeat for the lid.

Illustrated section 3

Stand up the front and back walls. Fold their tabs inward, apply a thin coat of glue to the tab faces, then raise the adjacent side walls and press them against the tabs. The tabs stay inside. Repeat on the lid and let both dry square.

Illustrated section 4

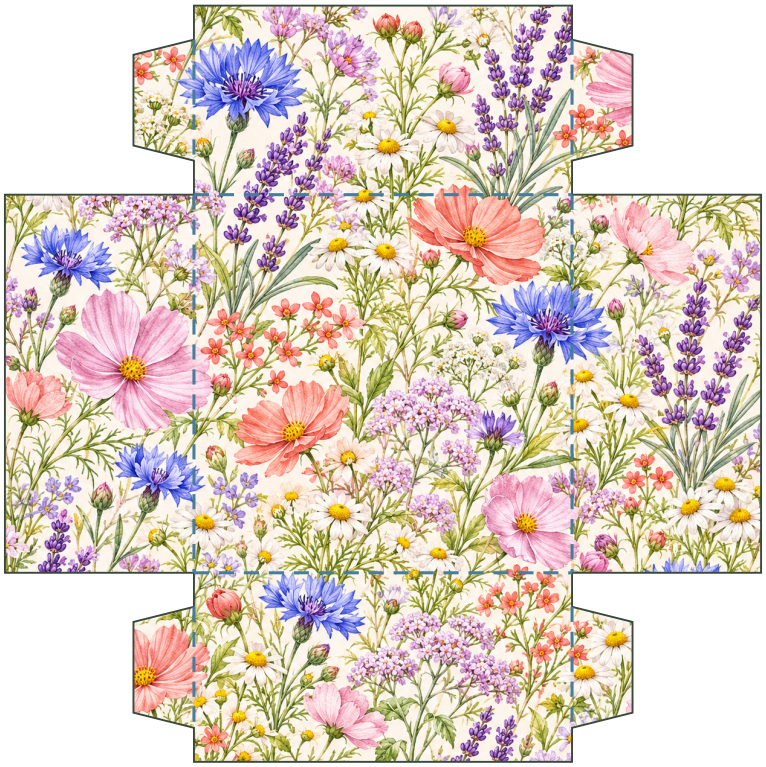

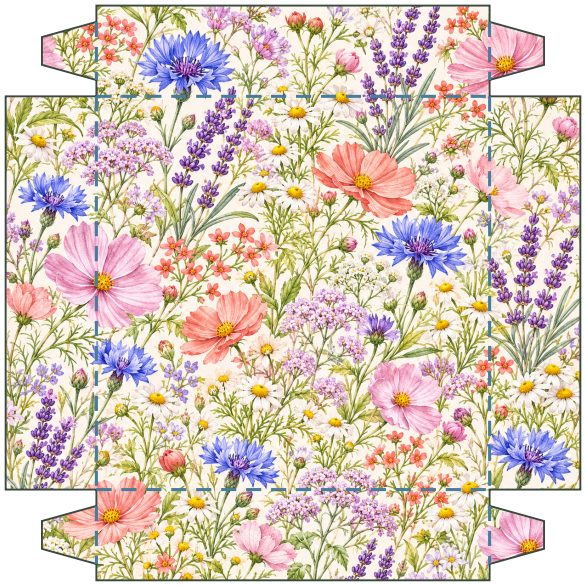

Test the dry lid gently over the base without forcing it. The 52 mm lid allows clearance around the 50 mm base. Use only light dry gifts; these shallow paper boxes are not food-safe packaging.
